

Ride Carrier

CUSTOM BUILT TO YOUR SPECIFICATIONS

Along with your amusement ride, you need a ride carrier to transport your ride from location to location. Being a custom trailer manufacturer, we can build most ride carriers needed for the midway. We will provide you with a strong, convenient easy-loading unit for any SBF/VISA s.r.l. models, Trains, Mini-Jets, and S&S Frog Hoppers. These carriers are made for their durability to endure many miles and trips made cross-country.

We construct all carriers with a heavy-duty steel tube trailer structure that provides stability in your unit. A hinged A-frame style hitch with 2 5/16" ball or lunnette for doubles, and extra-strength retractable axles with 16" tires including a spare, guarantee the ability to pull heavy loads. Four 4,000 lb. capacity hydraulic legs for leveling, hydraulic roof sign with chaser lights including spares, custom graphics, and racking for track, fencing, gates, and canopy are other standard features included in each ride carrier trailer.
